

RRV - Rapid Response Vehicle
Is a car to get to an injured or sick person faster than a traditional ambulance.

To make the SCAS Rapid Response Vehicle cut along the solid grey lines very carefully.

Then fold along the dotted grey lines and finally, glue the tabs marked with a dot.

CHILDREN - Please ask your parents or an adult to help with cutting these out, as scissors can be very sharp.

NOTE TO ADULTS:
Use child safety scissors for this project with supervision.
